

Registration and Event Links

Thank you for registering for Fraud Detection and Incident Response! We look forward to your participation in this course and are dedicated to ensuring that you are able to fully participate and not have your course experience affected by technical issues.

We ask that you please take the time to review the important information below. It includes details on how to access advance course documents; the links to complete your registration and attend the course; session times and important deadlines.

Access to Advance Course Materials

- From a computer or mobile device, login to the [EventBank App](#)
- Scroll down and find “Documents” (This is located directly under the instructor photo)
- Under the “Documents” header are two files which contain the course materials and a pdf version of the PowerPoint presentation. Participants may download and/or print these files to reference prior to and during the course.
- These documents are also accessible from the course’s EventBank agendas.

The full-color PowerPoint file is available for viewing/download via the link below:

<https://www.dropbox.com/s/2um19hqthqta467/ADVANCE%20SLIDES%20-%20Fraud%20Detection%20%26%20Incident%20Respinse-%20Assoc%20of%20Inspector%20Generals%20-%20Aug%202020%20%28John%20Hall%29.pptx?dl=0>

Please note that depending on the user's connection speed, it may take 20 to 30 seconds to open this file. Also, they may need to click the link that could appear on their screen suggesting opening the web version of PowerPoint.

Links to Finalize Registration and Allow Access to Both Course Sessions

Prior to Monday, August 10, 2020, attendees should complete their registration via the links below.

It is highly suggested attendees complete these steps **no later than 12:00 p.m. EST, August 7, 2020** to avoid issues on the morning of the course.

These additional registration steps are required to ensure attendees are placed on the instructor’s Zoom course access lists.

If attendees do not have a Zoom account, they'll need to create one to attend this course. Due to recent security updates to the Zoom application, existing users may be prompted to re-register their accounts. Clicking on the links below will direct participants to the Zoom application page where you'll be prompted to sign in or sign up, then complete your registration for this course. The passwords accompanying the below links should only be used if prompted to enter a password to register for the course. Do not use these passwords as your unique Zoom user login password.

These links are not available via EventBank. If the links below do not work, cut and paste them into your browser.

August 10, 2020:

https://zoom.us/webinar/register/WN_8cHmWqQxRw-9OAg3ibqQw

Password (if prompted): 197993

August 11, 2020:

https://zoom.us/webinar/register/WN_yFOpNcKeS0OdBdiUF4eO3Q

Password (if prompted): 917391

Ensure these tasks are completed prior to the program start time - which for both days is 8:30 a.m. EST. This allows participants to provide the name and e-mail address they want to use for both participation tracking and where they want CPE certificates sent.

PLEASE do not wait until the last minute to take these important steps, as the course facilitators will be busy conducting final course preparations 45 minutes prior to session times on both Monday, August 10, 2020, and Tuesday, August 11, 2020; therefore, they will be unavailable to assist with any last-minute registration or technical challenges.

Session Times

The instructor, John Hall, will login to Zoom at 7:45 a.m. EST both days, so attendees can sign on and enter the sessions early. Participants will be greeted/acknowledged every ten minutes. Again, after 7:45 a.m. EST, Mr. Hall and the course facilitators will be unable to assist participants further with registration and/or technical issues.

Program instruction on both days will start promptly at 8:30 a.m. EST, with a 15-minute break at 10:00 a.m. EST. Both sessions conclude at 12:15 p.m. EST, daily.

Organizational/Employee Zoom Access Restrictions

We recognize that some organizations may prohibit the use of the Zoom application on their devices. Attendees are asked in advance to ensure they consult with their IT

departments and/or find alternative workarounds, such as using a private computer or device.
